Gift Cards methods Raise.com 2021

This is an elite checking strategy 2021 which permits you to card Gift cards using Raise.com in the UK or USA. but you can use this carding method from anywhere (as all codes are digital).

REQUIREMENTS

To be able to reach success with this carding method, you will need the following tools;

- Live Fullz
- IP Masking Tools (Paid VPN with NO DMCA Response)
- New Gmail Account and a phone that is able to accept code (you can get that on hgmega.cc)

THE PROCESS

To begin this process you must use your Fullz to create a new gmail account which allows you to control the entire process, as well as setting up a new phone to actually join Raise.com later (this is your preparation for Raise.com carding method)

1. First step

Before anything use a paid vpn (such as NordVPN) to mask your location so that it matches the fullz country (e.g US Fullz = US Location) – Do not login to Raise.com without first turning on a VPN (be Opsec100)

2.Second step

Once masked, open up Raise.com with your sim card in your phone and complete the setup process by receiving an SMS code. Once setup, head to yourprofile and enter in information

as shown on your fullz, but make sure the email and number used, are those that you control. E.g Account First & Last Name should be Fullz First & Last name.

3.Third Step

Once you filled in the profile, head into the giftcard range and choose a giftcard under £25 (or USD equivalent) and order using your fullz. You will notice that if your transaction approves, your order will say pending/under review (chill yourself).

4.Fourth Step

Within 6 hours, Raise.com will send you an email asking you to verify/confirm the order, no information required, just a simple “Yes I made this purchase lastnight” and await the approval

5.Fifth Step

If you receive an approval email, simply login to Raise.com again to find your Giftcard code located in the Wallet Section of the App, once used/ redeemed simply keep using the card and redeeming 1 by 1 as you will only have to verify the new card once.

Now we just said IF in the paragraph above and this is because just like any carding work, the actual cardholder has a certain window of time where they can cancel a charge on their card before anything ships.

6.Repeat

Once you have had success, just keep repeating the information and keep on repeating the carding method using different CC/Fullz and different Sim cards each time.

ADDITIONAL INFORMATION

The following information is here to give you more chances of success with this carding method, as well as with carding in general.

1. Cardholders and authorisation cancellations occur as often as you eat food, because we now live in an era where real-time bank notifications are popping up via Apps (or via SMS) – If it occurs, move ahead don't complain, every carder loses out to cardholders
2. Do not use a device with a leaking name e.g Marcus's iPhone , this is becoming the easiest way carders lose out as this device name shows up way more than you may realise so just change it (e.g Longdick Phone)

BINS

Depends on what works for you

GOODLUCK

WE REGRET TO INFORM YOU THAT ORIGINAL CHANNEL ~~@HACKINGMEGA~~ DOES NOT EXIST ANYMORE ON TELEGRAM AS IT HAS BEEN DELETED, NOW [@RANHACKER](#) IS STILL ACTIVE ON ICQ. WE HAVE PROVIDED MEANS OF CONTACTING US FOR OUR SERVICES USING BELOW LIST.

TO PURCHASE TOOLS FOR YOUR JOBS,
