

WAYNE_SHOPS CASHAPP METHOD

REQUIREMENTS:

- > **NON VBVs (Low Security Debit Cards)**
- > **A GOOD VPN OR PROXY**
- > **MOBILE DEVICE (ANDROID OR iPhone)**
- > **A CASHAPP ACCOUNT (NEW OR OLD)**

HOW TO GO ABOUT IT:

Firstly, get your NON VBVs and a good VPN or Proxy to use, you could get that off CENT GEE, https://t.me/Dfw_church he is verified vendor for those on telegram and also if you need a walkthrough on this.

When you cop a NON VBV card it comes with the card holder's info, address, IP address, connect the Proxy or VPN, make sure your cashapp account is logged in on that device the proxy is on, the cashapp account could be new or old, based on the account limit.

NOTE: THE CASHAPP ACCOUNT YOU'RE USING CAN BE NEW AND UNVERIFIED YOU WIPE BASED ON THE ACCOUNT LIMIT.

STEP1:

Setup and connect the VPN or Proxy. You should have created or bought a cashapp account and a good NON VBV card before that, so you should be good. Now get on your cashapp account that's already logged in. it should look like this, now click on the marked area on the image.

STEP 2:

You should see the profile screen after clicking that, then click on **'Linked Banks'** and add a new card.

The next screen should look like the image below, this is the step of adding the NON VBV card info.

Now input the details of the card info, and click on the green button '**Link Card**', the card should add automatically without any verification or issues, as long as you did it well.

The card should be linked and ready to hit.

STEP 3:

Go back to the cashapp dashboard and click on '**ADD CASH**',

The next screen that pops up should be asking you how much you would like to add to your cashapp balance,

STEP 4:

When adding balance start small first, add \$37 first then you go higher adding \$200, then \$500, continue adding balances based on the card balance till card is wiped of most of it balance, once done unlink card immediately.

Once you start going higher, keep adding cash till the card is wiped. Once the card stops adding cash unlink immediately from the cashapp.

STEP 5:

Next step once you input the amount you want to add, click on '**ADD**'

Once you click on 'ADD' the balance adds up.

Once it adds up you should have it on your cashapp balance.

You can go higher to adding huge balances based on the card balance till the card is empty.

Immediately the card is empty, unlink the card you wiped.

Once you have the money on your cashapp balance, you can start sending to other cashapp accounts or request a digital cashapp card that you can spend online.

This method is new and still hitting. If you need CCs, Logs OR other methods hit me up on telegram: https://t.me/Dfw_church
