

LOADING CASHAPP USING DIRECT DEPOSIT AND CONVERTING TO BITCOIN PART 1

BY @wallstreetcalifornia

In this tutorial I will be teaching you guys how to load cash app using bank logs. Before we proceed you will need a cashapp account and there are two ways

- A. Registered cashapp using good fullz and scan ID for verification(which I don't recommend because of lack of history)**
- B. Buy a verified cashapp account with history.**

When buying verified cashapp with history make sure the seller provide you with the following

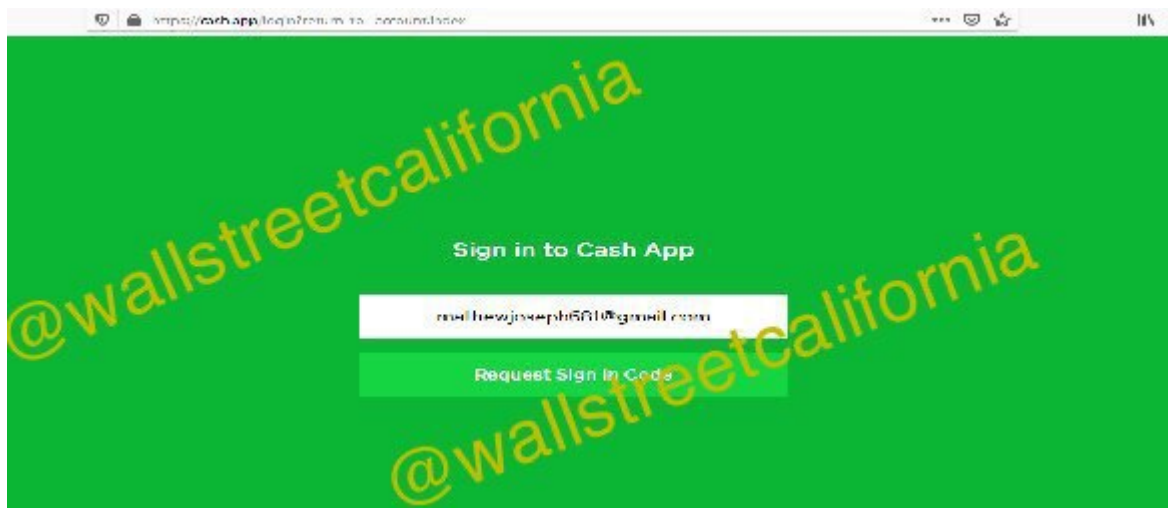

- 1. Email access of the verified account**
- 2. The Routine and Account number attached in the cashapp or Debit card number**

Let's start with the tutorial.

After purchasing your verified cashapp you then proceed by login in

As you can see from above you input the email and click on request access code

As you can see below the access code was sent to the email on file which I then have to input in the empty box above

We move to the next step which require either the phone number or Bank account

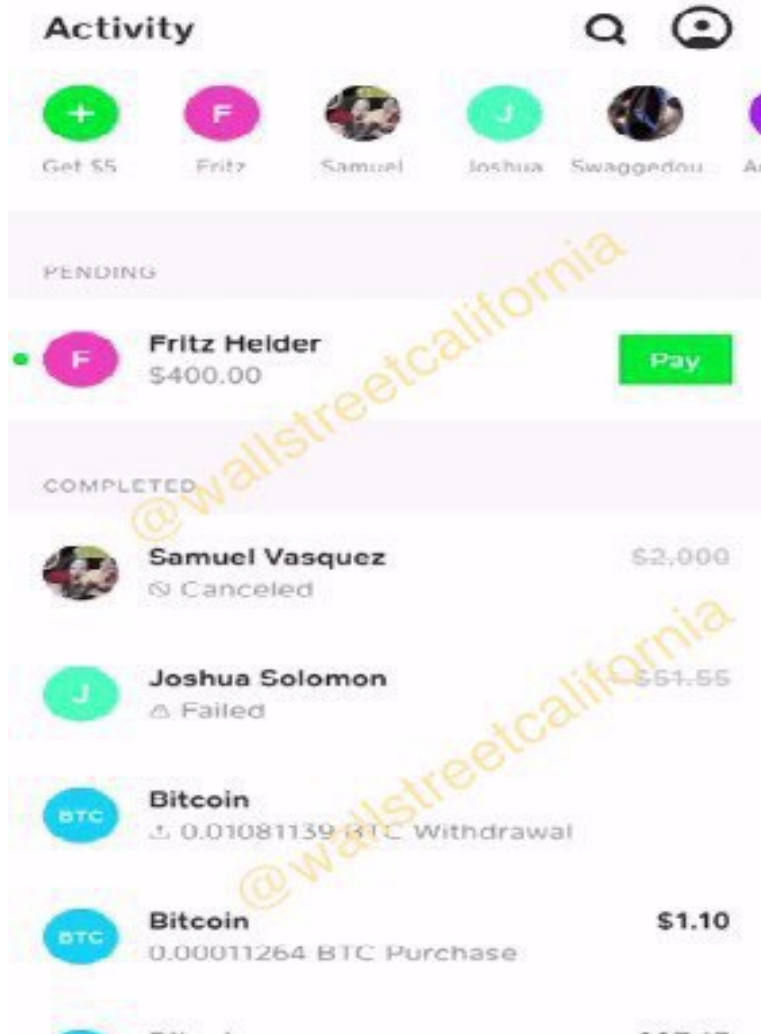

As seen below I choose to enter the routine and account number

LOADING CASHAPP WITH DIRECT DEPOSIT PART 2

From the part one tutorials, we have gotten our Account and Routine number of Cashapp. We then moved to our bank log so as to do bill pay.

I used Huntington Bank log.

Let's Start:

- 1) I login to my bank log and make sure the log comes with email access I not you won't be able to login. A code will sent to email which I will later confirm.
