<input type="text" value="Home Improvement"/>	<input type="text" value="Rent"/>	<input type="text" value="Employed"/>

Personal Annual Income (before taxes)

- Please provide only your **personal** annual income (before taxes) that can be verified.
- You do not need to include alimony, child support or separate maintenance income unless you want it considered as a basis for repaying the loan.
- If you include non-taxable income/benefits, increase the amount by 20%.

Current Home Address	Apt, Suite, Unit, etc.

Depending on the full details you should know if he is renting or is a home owner. Do not lie because they will do a background check. And you should choose home improvement but the trick comes to the personal annual income.

For the Bank Account that you have you have to make sure you have the logins so as to know if how much as income is been paid either on a weekly or monthly basis and you do your calculation times 12. That means if you check the bank account an \$2000 is being paid on a monthly basis you then calculate  $\$2000 \times 12 = \$24000$ . So \$24000 is the annual income.

You then fill the remain part of the application and click see option which is found below
