

CASH APP METHOD

If you have add a card on your cashapp already use the same Bank, for example if you have had a BOA card on your cashapp

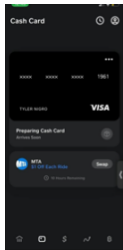

Buy a BOA debit/credit to card on your account

First you need to see if your cashapp will let you add debit or credit

a couple of it's pops up to add credit or a debit do before you waste 40\$ on a CC need you to check

Check by try adding card a card to your cashapp

it can be yours or your cousin it dosent matter just had to be valid @lilkeemer

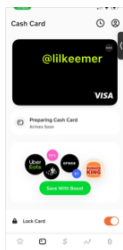

it should tell you if you need to add a debit or credit.

if it doesn't tell you add a specific type of card then use that type

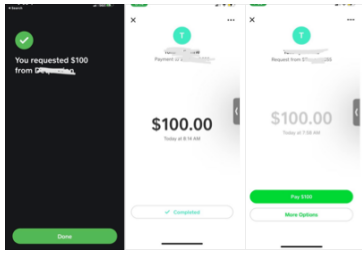

like if you used a credit and it didn't ask you to use a debit then use a credit to card it

after you find that out buy you a CC closest to your location/city/state

in the same Bank your card is with on the cashapp app, after this add the card to it

Get another account and have somebody request \$100 to your account

then try to pay the request with the card then keep requesting and paying till it doesn't allow you anymore.
